Permeable design

A rigid but open cellular design allows the grids to provide both exceptional support and water management.

Lightweight

Complies with HSE manual handling guidelines.

Flexible

Polymer construction is semi flexible and resistant to cracking unlike concrete.

Application options

Open cells can be filled with either gravel or soil and seed depending on your application.

Environmentally friendly

Manufactured from 100% recycled plastic.

High load

Meets high SLW vehicle usage specifications, up to 60 metric tonnes-DIN 1072.

Stable

Location fit connection improves stability once units are in position.
